## ENDLESS POSSIBILITIES WITH THE NEW LOFT LIVING CONCEPT FROM NEVILLE JOHNSON

Never before has there been such a call for making the most of your existing space, rather than moving elsewhere – and it's widely acknowledged that a loft can prove an astonishingly effective solution for providing that extra bedroom, study or play area. But how do you maximise this often vast, yet nearly always challenging, area of the home?

In response to the increase in loft conversions, Neville Johnson, pioneers of stylish and bespoke fitted furniture, has created "*Loft Living*". This concept has been specifically created with the opportunities, as well as the limitations, of a loft space in mind. This means you can work around every beam and into every last corner truly maximising your space and storage opportunities.

**The Loft Living study concept: Cream painted detail for a striking finish**

A carefully planned loft space can add up to 15% to the value of your home\*, so it is worth getting it right. Neville Johnson are experts in working to a customer's specific space and lifestyle requirements, and will provide a completely bespoke design. Furniture can be built around pre-existing architectural features including into the apex, to ensure no space is wasted and the result is both beautiful and practical.

The concept allows complete flexibility. Whether you are keen for a secluded work space away from the chaos of family life or a second living area for the children, there is an abundance of furniture to consider, from open and closed storage solutions, glazed display units and desks. And, because everything is made to measure, even shelving can be produced to a specific height depending on your books and folders.

Aware of the importance of a stunning, streamlined look, Neville Johnson allows you the freedom to choose from a tremendous range of finishes. From sumptuous waxed oak veneer with its beautiful natural grain detail, to contrasting paint and gloss colours for a truly personalised touch.

This versatility means that additional design details such as etched glass, radiator covers and integrated lighting features can also be included in your scheme. Not only do you have the option of creating a bold design statement with bright colours, you can also match materials to the current design of your home.

So why not unlock your home's potential and see what Neville Johnson can do for you? The Loft Living concept starts at £3000 + VAT, with flexible payment options available. Call 0161 873 8333 to arrange a no obligation consultation with a Neville Johnson designer or to receive a free colour brochure. A wide selection of bespoke fitted furniture concepts including bedroom, cinema, living room, library and study can also be viewed at [www.nevillejohnson.co.uk/pr](http://www.nevillejohnson.co.uk/pr).
